Professional Summary

Full Stack Software Engineer with 4+ years of experience building production web applications, backend APIs, microservices, and workflow automation. Strong in **JavaScript, TypeScript, React.js, Node.js, Java Spring Boot, REST APIs, SQL/NoSQL databases, AWS, Docker, testing, CI/CD, and AI workflow automation**. Known for end-to-end ownership across feature delivery, third-party integrations, production debugging, performance optimization, and code quality.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java, Python, SQL

Frontend: React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS, Material UI, Responsive Web Design

Backend & APIs: Node.js, Express.js, Java Spring Boot, RESTful APIs, Microservices Architecture, WebSockets, Kafka

Databases & Search: MySQL, MongoDB, Redis, DynamoDB, Neo4j, Elasticsearch

Cloud & DevOps: AWS, Amazon S3, API Gateway, Docker, GitHub Actions, CI/CD Pipelines, Linux, Cloudflare

Testing & Quality: TDD, Mocha, Chai, Sinon, Unit & Integration Testing, ESLint, Prettier

Security: JWT, OAuth 2.0, OTP Verification, API Security, Helmet.js

AI & Automation: n8n, GenAI, LLMs, Prompt Engineering, AI Workflow Automation, GitHub Copilot, Cursor, Claude Code

Tools & Practices: Git, GitHub, Postman, Sentry, Kibana, JIRA, Agile, Scrum, Last9.io

Professional Experience

Software Development Engineer I

February 2024 – Present

Incred Finance — Loan Approval Platform

Bengaluru, India

- Own production **loan approval and digital consent workflows** across application intake, verification, and approval journeys, improving platform reliability and reducing manual operations follow-up
- Mentored **5+ members including engineering and QA team** on delivery planning, code reviews, debugging, and releases, improving execution efficiency by **30%**
- Integrated **multiple Spring Boot and Node.js microservices** with internal **REST APIs** and **third-party vendor APIs** including **Perfios**, maintaining **99.95% uptime**
- Engineered **JWT-secured email and SMS verification workflows** for customer consent, achieving **99.7% delivery** and improving conversion by **22%**
- Standardized quality gates with **ESLint, Prettier, Commitlint, and Husky hooks**; automated **DynamoDB purge and cleanup scripts** to improve support investigations and **CI/CD** reliability

Software Development Engineer I

December 2023 – February 2024

Sevenloop Technology — ERP Solutions

Bengaluru, India

- Built reusable **email template and dynamic form builders** for ERP onboarding, enabling non-technical teams to manage workflows while resolving **20+ production bugs** and reducing user-reported issues by **40%**

Software Development Engineer I

March 2022 – December 2023

Springworks — AI-Powered SaaS Platform

Remote

- Architected a scalable **file parsing and validation system** for AI-powered SaaS platforms, reducing backend processing load by **20%** while optimizing **Amazon S3** storage costs
- Raised automated test coverage to **80%** with **Mocha, Chai.js, and Sinon**, reducing production incidents by **30%** through unit, integration, and regression test coverage
- Maintained **99.9% uptime** for customer-facing automation pipelines through proactive monitoring, incident resolution, and preventive reliability fixes

Featured Projects

Full-Stack E-Commerce Platform — newrajshreesweets.com

- Designed and launched a production-grade **e-commerce and ERP platform** using **React.js, Node.js, MySQL, Redis, REST APIs, and payment gateway integrations**
- Built a real-time **WebSocket-based kiosk ordering system** for in-store customers, enabling self-service ordering, automatic token generation, and token printing
- Implemented secure **JWT authentication, SMS-based OTP verification**, payment gateway integrations, and POS systems, maintaining **99% authentication success** and **95% transaction success**
- Developed a centralized **CRM and admin dashboard** for orders, inventory, customers, and analytics, reducing manual administrative tasks by **80%**
- Reduced query response times by **60%** through **MySQL indexing and Redis caching**; integrated an **AI-powered chatbot** using **n8n** and database-backed knowledge bases

Education

Bachelor of Technology in Computer Science (Honours)

2019 – 2023

GLA University, Mathura, India — CGPA: 8.23/10.0
